Preface

The South Carolina Statistical Abstract is a comprehensive, single-source reference for demographic and economic data pertaining to the state. Data are compiled from in-house data bases and a variety of federal, state, local, and private sources. In addition to pertinent data for South Carolina, the Abstract presents comparative data for other southeastern states and the United States in many of the sections. Every effort is made to obtain the most up-to-date information possible. It is impossible to insure uniformity, but time periods are always stated on the tables.

Located in the Abstract are the latest statistics on factors impacting the state's social and economic development: manufacturing, importing and exporting, construction, housing, business and industry, wholesale and retail trade, employment, banking and finance, income, taxes, education, climate, recreation and tourism, population, vital statistics, etc.

It is impossible to compile and publish the South Carolina Statistical Abstract without the continued cooperation and assistance of numerous persons in both public and private agencies who generously contributed much of the data contained in this volume.

We hope you find the Abstract useful and informative. Many persons have contributed suggestions which have been incorporated into this volume. We invite your comments and suggestions for future editions.

The State Data Center of the Division of Research and Statistical Services has prepared the 1989 South Carolina Statistical Abstract using the latest information available. Census-generated maps were produced at the Humanities and Social Sciences Lab of the University of South Carolina, using the GIMMS mapping package.

Information and assistance was provided by state and federal agencies and other organizations from around the state. A complete listing of these agencies and organizations is found in the Source Appendix.

The following statistical items give, for each state, the value of the item and the state's rank in comparison to other states. The primary source of the rankings is the 1987 edition of the Statistical Abstract of the United States, a U.S. Bureau of the Census publication which includes a selection of social, political, and economic data gathered from statistical publications and unpublished records of numerous governmental and private agencies. The rankings presented in this chapter are intended to serve as only a general reference as to where South Carolina stands in relation to other states on the various statistical items, and users are discouraged from drawing conclusions from the rankings without consulting the original sources for definitions and concepts of the data on which the rankings were developed. For information concerning these sources, contact the South Carolina State Data Center at 734-3788.

Glossary

Agriculture Industry - Includes SIC industry categories: Agricultural Production, Crops; Agricultrual Production, Livestock; Agricultural Services, Excep. Horticultural; and Horticultural Services.

Farm - A farm, as defined for the 1982 and 1978 censuses, is any place from which $1,000 or more of agricultural products were sold, or normally would have been sold, during the census year.

Farm Marketings - Farm marketings represent agricultural products sold by farmers multiplied by prices received per unit of production at the local market.

NOTE - Discrepancies found in figures in this section are due to the different sources of information. Some information was obtained from the U. S. Bureau of the Census, which conducts a Census of Agriculture every five years. Preliminary reports are published on a flow basis for all counties in the United States with ten farms or more, and for each State and the United States. Data for the States published in the 1978 Census of Agriculture were obtained through a combination of mail list enumeration and personal canvass of a sample of area segments, which provided estimates for farms not on the mail list. For 1982, the area sample survey was not conducted; thus, the data represent only farms on the mail list.

Other charts found in this section were provided by the South Carolina Agricultural Statistics Service. This Service is a cooperative effort between the Statistical Reporting Service of the U. S. Department of Agriculture and the Department of Agricultural Economics and Rural Sociology and Agricultural Experiment Station of Clemson University. State funds make it possible to prepare and publish more detailed statistics for South Carolina more frequently. Differences between the sets of figures result from different reporting methods. Further information can be obtained from sources listed in the Appendix.

Gross Farm Income - Includes four principal components: (1) cash receipts from farm marketings of farm products represent gross receipts from commercial market sales as well as loans (net redemption) made or guaranteed by the Commodity Credit Corporation and other purchases under price support programs; (2) government payments to farmers are those made directly to farmers in connection with farm programs; (3) noncash income includes the value of farm production consumed directly in farm households and the rental value of housing provided by farm dwellings--because expenses associated with these products and the dwellings are included in the production expense estimates, noncash imputations do not add on a dollar-for-dollar basis to the net; (4) other farm income is cash income from sources such as recreation, machine hire, and custom work.

Farm Production Expenses - Include current farm operating expenses for such items as wages paid to hired labor (in cash and in kind), outlays for repairs of equipment and operation of the farm, as well as purchases of oil, feed, seed, and livestock. Overhead-type costs include charges for depreciation and other capital consumption, taxes on farm porperty, and interest on the farm mortgage debt.

Net Farm Income - Represents what is left of gross farm income after deducting farm production expenses.

Forest Land - Land at least 16.7 percent stocked by forest of any size, or formerly having had such tree cover, and not currently developed for nonforest use.

Forestry and Fisheries Industry - Includes SIC industry categories: Forestry and Fishing, Hunting, and Trapping.

Mining Industry - Includes SIC industry categories: Metal Mining; Coal Mining; Crude Petroleum and Natural Gas Extracting; and Nonmetallic Mining and Quarrying, Except Fuel.

1/: Sand and gravel producers are canvassed every other year; therefore, the 1984 value is used.

2/: Estimated.

Note: The value of mineral production in South Carolina in 1987 increased about 5 percent, to an estimated $177 million. Commodities contributing to the bulk of the value include crushed stone, kaolin, limestone/marl (for cement), sand and gravel, and vermiculite.

Glossary

BANKING

Banks - Banks in this country are organized under the laws of both the States and the Federal Government. State-chartered banks are supervised by officials of the respective States. "National" banks are supervised by the Comptroller of the Currency.

Savings and Loan Associations - Unlike banks, are not engaged in deposit banking; primarily involve themselves in credit extension in the form of loans.

REVENUES

General Fund - The State's largest primary revenue-generating fund group. It represents a composite of revenue sources derived from taxation, licenses, fees and all institutional and departmental revenues or collections, including income from the sale of commodities and services or other activities which provide funds for the fiscal operation of State government. The various revenues making up the General Fund are categorized into two source descriptions for accounting purposes in the fiscal State Budget: Regular Sources and Miscellaneous Sources.

> **Regular Sources** - Revenues collected on an established basis from year to year. These include the Sales and Use Tax, Income Taxes, (individual and corporation), and an All Other segment comprised of twenty-eight additional tax, interest, assessment and/or license accounts.
>
> **Miscellaneous Sources** - Revenue that is not as predictable as collections from Regular Sources. Generally, this classification incorporates: (1) those receipts which do not always recur in succeeding years, often labelled "windfall revenues;" (2) first-year collections of newly enacted taxes; and (3) line-item transfers of agency appropriations to the General Fund for specific purposes.

Aid to Subdivisions - Distribution of State aid to counties and municipalities. Except for a reimbursement to counties for a homestead exemption (property tax), funds are allocated on a percentage basis from total collections of designated State taxes. The distribution formula is prescribed by statute and is subject to change. Types of funds: (1) Unrestricted--such monies may be used for the general operations of the county, city, or town; (2) Restricted--the expenditure of such monies is designated, by laws or regulations, to a particular project or program.

EXPENDITURES

General Fund (South Carolina) - The expenditure data is presented by functional group for the State's Budgetary General Fund using the State's legal basis of accounting. Consequently, the data reported here differs from data reported in accordance with Generally Accepted Accounting Principles. The Budgetary General Fund excludes: (1) Expenditures of Federal monies; (2) Most permanent improvement expenditures (i.e., construction, expansion, renovation, repair, and maintenance of physical plant assets); (3) Most expenditures of department-generated revenues; (4) Expenditures under the Education Improvement Act of 1984; and (5) Expenditures of the State Highway Fund.

State Government - This category refers to the governments of the 50 states which constitute the United States.

Local Government - The Bureau of the Census classifies local governments by five major types--county, municipality, township, school district and special district.

Glossary

Establishment - A single physical location where business is conducted or where services or industrial operations are performed. Establishment counts are based on a determination of active status as of anytime during the year.

Unclassified Establishments - Include establishments, typically new businesses, that cannot be classified in any major industry group because of insufficient information.

Annual Payroll - The combined amount of wages paid, tips reported, and other compensation, including salaries, vacation allowances, bonuses, commissions, sick leave pay, and the value of payments in kind (such as free meals and lodging) paid to employees before deductions for social security, income tax, insurance, union dues, etc.

Industry Classification - Industry classifications are based on the major industry groups of the 1972 edition of the *Standard Industrial Classification Manual* (SIC) and the 1977 supplement to that manual.

Wholesale Trade - Includes all establishments with one or more paid employees primarily engaged in selling merchandise to retailers; to industrial, commercial, institutional, farm, or professional users; or to other wholesalers. Companies selling products to which they have title, as well as those acting as agents or brokers in buying merchandise for (or selling merchandise to) others, are included. Excludes governmental organizations classified in the covered industries except for wholesale liquor establishments operated by State and local governments.

Retail Trade - Includes all establishments primarily engaged in selling merchandise for personal or household consumption and rendering services incidental to the sale of the goods. Excludes governmental organizations classified in the covered industries except for liquor stores operated by State and local governments.

Foreign Affiliation - Defined in accordance with the U.S. Department of Commerce definition, which encompasses "a wide degree of foreign ownership and control with ranges from the complete and absolute to a shared but dominant position to a level of ownership and control that simply permits a significant influence over company plans." Companies with foreign affiliation are foreign-owned directly by non-U.S. companies and directly by U.S. companies which are, in turn, owned by non-U.S. companies.

Glossary

Heating Degree-Day - A temperature index defined as the number of degrees that the actual average temperature for the day is below some base temperature (usually 65 degrees Fahrenheit).

Cooling Degree-Day - A temperature index defined as the number of degrees that the actual average temperature for the day exceeds some base temperature (usually 65 degrees Fahrenheit).

Census Designated Place - A densely settled population center without legally defined corporate limits or corporate powers or functions, but with a definite residential nucleus. Boundaries are drawn by the Census Bureau in cooperation with State and local agencies to include, insofar as possible, all closely settled areas. The term "place," as used by the Census Bureau, refers to a concentration of population, regardless of the existence of legally prescribed limits, powers or functions.

Incorporated Places - Political units incorporated as cities and towns; concentrations of population with legally defined boundaries and legally constituted governmental functions

1/: Surface water withdrawal for Savannah River Plant is 769.04 MGD; industrial surface water usage total minus Savannah River Plant usage equals 438.829 MGD.

Note: Category totals include water purchased by wholesale and retail customers with the exception of purchases from unverified sources, which accounted for approximately 0.3 percent of total water withdrawals.

Glossary

ELEMENTARY AND SECONDARY EDUCATION

Average Daily Attendance (ADA) - Is the aggregate number of days in attendance for a given period divided by the number of days the school is in session during this period.

Average Daily Membership (ADM) - Is the aggregate number of days in membership for a given period divided by the number of days the school is in session during this period.

Enrollment - Enrollment at beginning of the school year plus new enrollments from a non-public school or another state. Withdrawals are not subtracted from the enrollment figures.

Schools - The National Center for Education Statistics (NCES) defines a school as a division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant, as is the case when the elementary programs are housed in the same school plant.

> Regular schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools. Public schools are schools controlled and supported by local, State or Federal governmental agencies; private or non-public schools are those controlled and supported mainly by religious organizations or by private persons or organizations.
>
> The Bureau of the Census defines elementary schools as including grades 1 through 8; high schools as including grades 9 through 12; and colleges as including junior or community colleges, regular 4-year colleges, and graduate or professional schools.

School Year - Except as otherwise indicated in the tables, data relating to enrollment and staff refer to the school year, which includes 180 days for students and 185 days for staff. Generally, the school year begins in August and ends the first week in June. Statistics concerning finances are for a 12-month period beginning July 1.

HIGHER EDUCATION

Bachelor's Degree - Requires successful completion of at least four, but nor more than five, years of academic work.

Doctor's Degree - Includes such degrees as Doctor of Education, Doctor of Juridical Science (S.J.D.), Doctor of Philosophy in any field.

First Professional Degree - Signifies the completion of the academic requirements for a selected profession, which is based on an educational program requiring at least two academic years of previous college work for entrance and which requires a total of at least six academic years of college work for completion. Examples of first professional degrees are the Doctor of Jurisprudence (J.D.) and Bachelor of Laws (LL.B.), Doctor of Dental Surgery (D.D.S.) and Doctor of Medicine (M.D.) degrees.

Master's Degree - Is customarily granted upon successful completion of one (sometimes two) academic years of work beyond the bachelor's degree.

Technical Education - Programs designed to prepare individuals for employment. Completion of a two-year curriculum leads to an Associate in Applied Science degree.

Unduplicated Headcount - The number of students enrolled in each listed program. A student is counted in only one curriculum. The extension totals are also unduplicated headcount. Although a student in extension may be counted in each program, he is counted only once in the total.

Glossary

Labor Force - All persons classified in the Civilian Labor Force plus members of the Armed Forces (persons on active duty with the United States Army, Air Force, Navy, Marine Corps, or Coast Guard).

Civilian Labor Force - All civilians who are classified employed or unemployed. (Excludes military personnel)

Nonagricultural Employment - Full- and part-time wage and salary workers who are employed during the week that includes the twelfth of the month. Not included are armed forces personnel, unpaid family workers, proprietors, self-employed persons, and workers in private households.

Occupation - The Occupation Classification System developed for the 1980 Census was developed to be consistent with the 1980 Standard Occupational Classification (SOC) Manual, and consists of 503 specific occupation categories arranged into 6 summary and 13 major occupation groups.

Industry - The Industry Classification System developed for the 1980 Census consists of 231 categories classified into 13 major industry groups. The 1980 Census classification was developed from the 1972 Standard Industrial Classification (SIC) Manual and the 1977 supplement to that manual.

Unemployment Rate - Persons are classified as unemployed if they are civilians 16 years old and over and (a) are neither "at work" nor "with a job but not at work," (b) are looking for work, and (c) are available to accept a job. The unemployment rate is the total number of unemployed people as a percent of the civilian labor force.

Occupational Injury/Illness Incidence Rate - The number of injuries and/or illnesses, or lost workdays per 100 full-time workers. The rate is calculated by multiplying the number of injuries and/or illnesses, or lost workdays by 200,000 hours (base for 100 full-time equivalent workers working 40 hours per week, 50 weeks per year) and dividing the result by the total hours worked by all employees during the calendar year.

1/: Incidence Rates are per 100 full-time workers.

2/: To maintain comparability with the rest of the series, a statistical method was used for generating the estimates to represent small non-farm employers in low-risk industries who were not surveyed.

Note: Data since 1976 excludes farms with fewer than 11 employees.

Glossary

Distillate Fuel - No. 1 and No. 2 fuel oils, but not kerosene; primarily No. 2 fuel oil.

Gasohol - A mixture of 90 percent gasoline and 10 percent ethyl alcohol.

Hydro Energy - A term used to identify a type of generating station output in which turbine generators are driven by water power.

Kilowatt (KW) - 1000 Watts

Kilowatt Hour (KWH) - The basic unit of electric energy equal to one kilowatt (1000 Watts) of power flowing through an electric current steadily for one hour.

Natural Gas - A gaseous combustible mixture of several hydrocarbons (including methane, ethane, propane, and butane) and minute amounts of other compounds.

Nuclear Energy - Energy produced in the form of heat during the fission process in a nuclear reactor. When released in sufficient and controlled quantity, this heat energy may be used to produce steam to drive a turbine generator to produce electricty.

Watt - The electrical unit of power or rate of doing work. It is the rate of energy transfer equivalent of one ampere flowing under a pressure of one volt.

Glossary

Governmental Units - A government is an organized entity whose governmental character is evidenced by popular election of the officials or their appointment by public officials, a high degree of public accountability, and the power to raise revenue to provide authorized services. In addition, a governmental unit must have sufficient discretion in the management of its own affairs to distinguish it from the administrative structure of any other governmental unit.

Municipality - A municipality is a political subdivision within which a municipal corporation has been established to provide general local government services for a specific population concentration in a defined area.

Special District - Special districts are local governmental units created to provide specific services that are not being supplied by other governments. These governmental units are known by a variety of titles including districts, authorities, boards, and commissions. A majority of special districts are established to perform a single function, but some have been given authority to provide several, usually related, kinds of services.

Glossary

Aid to Families with Dependent Children (AFDC) - Financial assistance available to families with children who are deprived of parental care or support due to the absence or incapacity of one or both parents. Payments are based on the differences between income available to the family and the total allowance established under the Consolidated Standard of Need for food, clothing, shelter, utilities, household furnishings, equipment and supplies, personal expenses, medicine (other than prescription drugs), certain school fees, and transportation costs for the members in the budget unit.

Food Stamp Program - A federal, state and local program designed to provide individuals meeting certain income eligibility standards set by the federal government with coupons for food through purchase or as a reduction from their assistance payment. The purchase price of the coupons is less than the dollar value of the goods they can purchase.

Medicare - A federal hospital and medical insurance protection plan enacted in 1965 under the Social Security program. The program was designed to cover persons 65 and over and has been expanded to include persons under 65 who have been entitled to disability checks for 2 or more consecutive years and persons with permanent kidney failure who need dialysis or kidney transplants.

Social Security - A U.S. government program designed to provide continuing income when the individual or family earnings are reduced or stopped because of retirement, disability or death. The program was established in 1935 covering only the worker at retirement but has been gradually extended to include provisions for old age and survivors insurance, contributions to state unemployment insurance, and old age assistance.

Vocational Rehabilitation Services - A state and federal program desighed to help those with mental or physical disabilities and those with handicaps to become more employable and get jobs. Services include eligibility determination, designing vocational rehabilitation programs, placing clients in jobs, and follow-up programs after employment.

Glossary

Contract Rent - Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included

Family - A family consists of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The measure persons per family is obtained by dividing the number of persons in families by the total number of families (or family householders).

Household - A household includes all the persons who occupy a housing unit. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements. The measure persons per household is obtained by dividing the number of persons in households by the total number of households.

Housing Unit - A housing unit is a house; an apartment; group of rooms; or a single room, occupied as separate living quarters, or, if vacant, intended for occupancy. Separate living quarters are those in which the occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements. Both occupied and vacant housing units are included in the housing inventory, except that tents, caves, boats, vans and the like are included only if they are occupied. Vacant mobile homes are included, provided they are intended for occupancy on the site where they stand. Vacant mobile homes on dealers' sales lots, at the factory, or in storage yards are excluded from the housing inventory.

> **Year-Round Housing Units** - All occupied units plus vacant units which are intended for year-round use. Data on housing characteristics are limited to year-round units. Vacant units held for seasonal use or migratory labor are excluded because it is difficult to obtain reliable information for them. Counts of the total housing inventory include such units.

Value - Value is the census questionnaire respondent's estimate of how much the property (house and lot) or condominium unit would sell for, if it were for sale.

1/: No annual report received; if a monthly reporter, reports received for fewer than 9 months.

2/: Detail does not add to totals because totals include data for county's submitting incomplete reports.

Note: Data in this table reflect the sum of housing units authorized by all permit-issuing places within each county. County totals may not reflect actual number of housing units authorized in a county due to incomplete reporting for the year.

Glossary

Personal Income - The Bureau of Economic Analysis defines Personal Income as the income received by, or on behalf of, all residents of an area from all sources. It is the sum of wage and salary disbursements, other labor income, proprietors' income, rental income of persons, personal dividend income, personal interest income, and transfer of payments, less personal contributions for social insurance. Although most of the income is in monetary form, there are important nonmonetary inclusions--chiefly, estimated net rental value to owner-occupants of their homes, the value of services furnished without payment by financial intermediaries, and the value of food consumed on farms. Not only individuals, but non-profit institutions, private trust funds, and private health and welfare funds are classed as "persons."

Disposable Personal Income - Personal income less personal tax and nontax payments; the income available to persons for spending or saving.

Real Personal Income - Total personal income after adjusting for inflation.

Implicit Price Deflator - An index used to measure personal consumption expenditures based on changes in prices of goods and services.

Money Income - Money Income, as reported by the Bureau of the Census, differs from Personal Income in that it is measured before the deduction of personal contributions for social insurance, and does not include imputed income, lump sum payments, and income received by quasi-individuals. Money income does not include income from private pensions and annuities, and interpersonal transfers such as child support payments. Money Income estimates are usually lower than Personal Income estimates.

Family Income - Income of all members 15 years old and over in a family, summed and treated as a single amount.

Household Income - Includes the income of the householder and all other persons 15 years and over in the household, whether related to the householder or not. Since many households consist of one person, average household income is usually less than average family income.

Median Income - The amount which divides the distribution into two equal groups, one having incomes above the median and the other having incomes below the median. For families, median income is based on the distribution of the total number of units including those with no income. The median for persons is based on persons with income.

Per Capita Income - The mean income computed for every individual, man, woman, and child (and quasi-individuals, in the case of Per Capita Personal Income) in a particular group. It is derived by dividing the total income of a particular group by the total population in that group.

Poverty - Poverty statistics are based on a definition originated by the Social Security Administration in 1964 and subsequently modified by Federal interagency committees in 1969 and 1980. Poverty thresholds are revised annually to allow for changes in the cost of living as reflected in the Consumer Price Index. The average poverty threshold for a family of four persons was $7,412 in 1979.

Persons for Whom Poverty Status is Determined - Poverty status is determined for all persons except inmates of institutions, persons in military group quarters and in college dormitories, and unrelated individuals under 15 years old.

Notes: Table includes places incorporated since January 1, 1980, and reflects some annexations and consolidations that have occurred since that date.

Bureau of the Census per capita income estimates are based on Money Income, while Bureau of Economic Analysis estimates are based on Personal Income (see Glossary for definitions). Therefore, comparisons between the Bureau of the Census estimates in this table and the Bureau of Economic Analysis estimates presented in other tables should be made with caution.

Glossary

Crime Index - The Crime Index is used as a basic measure of crime. The crimes were selected for use as an index on the basis of their serious nature, their frequency of occurrence, and the reliability of reporting from citizens to law enforcement agencies. The offenses of murder, rape, robbery, and aggravated assault are categorized as violent crimes; offenses of breaking or entering, larceny, and motor vehicle theft are categorized as nonviolent crimes. The Crime Index is the total of these offenses that come to the attention of law enforcement agencies.

Crime Rate - The Crime Rate indicates the number of Index Crimes per unit of population, generally per 10,000.

Juvenile - For purposes of juvenile jurisdiction of the district courts, a juvenile or "child" is defined as being, with two exceptions, one who has not reached his or her eighteenth birthday and is not married, emancipated, or a member of the armed services of the United States. The exceptions are where a person has committed, or is alleged to have committed, a criminal offense, including violations of motor vehicle laws; or has violated the conditions of probation previously ordered in a court proceeding. For these latter situations, the statutes provide that a juvenile or child is one who has not reached his or her sixteenth birthday.

Parole - Release from prison before completion of sentence by the Parole Commission; subject to specified conditions, usually including supervision by an appointed authority and subject to revocation and imprisonment if the conditions are breached.

Probation - Suspension of an active prison sentence by a trial judge; subject to specified conditions, usually including supervision by an appointed authority and subject to revocation and imprisonment if the conditions are breached.

Youthful Offender Act (YOA) - The Youthful Offender Act provides for indeterminate sentencing of offenders between the ages of 17 and 21, extended to 25 with offender consent. The Act allows the court to sentence a youthful offender indefinitely to the custody of the South Carolina Department of Corrections. The period of such custody, however, will not exceed six years.

Glossary

Incorporated Places - These are political units incorporated as cities and towns. There is a concentration of population with legally defined boundaries and legally constituted governmental functions.

Race - Information on race was obtained in the 1980 Census through self-identification; therefore, the data represent self-classification by people according to the race with which they identify themselves.

Spanish Origin - Persons of Spanish origin or descent are those who classified themselves in one of the specific Spanish origin categories listed on the Census questionnaire -- Mexican, Puerto Rican, or Cuban -- as well as those who indicated that they were of other Spanish/Hispanic origin. Persons of Spanish origin may be of any race.

Urban-Rural Residence - The determination of urban-rural residence is made after Census results have been tabulated. Geographic areas are classified as urban or rural on the basis of their population size and/or density at the time of the Census.

Urban Population - All persons residing in areas determined to be Urbanized Areas or in places of 2,500 or more outside Urbanized Areas.

Urbanized Areas - These areas are defined by population density and are composed of an incorporated place and surrounding densely settled areas that together have a combined population of at least 50,000. There is no minimum size for the incorporated place that forms the central city of the area. The boundaries of Urbanized Areas do not generally conform to county boundaries.

Glossary

Travel - The act of taking a "trip".

Traveler or Tourist - Includes persons going outside their daily commuting zones. State residents traveling on trips away from home are included in the total, along with out-of-state visitors. The estimates include persons traveling for business, pleasure, and personal affairs. Also included are travelers passing through en route to destinations beyond, and parties making short trips, such as weekend or holiday visits. One-day as well as overnight trips are included. Regular commuters are not included.

Trip - A trip occurs every time one or more persons goes to a place 100 miles or more away from home in one day, or is out of town one or more nights, and returns to his origin. Specifically excluded from this definition are: (1) travel as part of an operating crew on a train, plane, bus, truck, or ship; (2) commuting to a place of work; (3) student trips to school or those taken while in school. Also excluded is foreign travel activity in the United States.

Visitor - This term is usually limited to special studies of individual cities or metropolitan areas. It includes those not residing in the area under study who travel away from home overnight or on a day trip of 200 round-trip miles or more and visit the area. As a general rule, total travel impact on an area less the impact of area residents equals visitor impact.

WILDLIFE MANAGEMENT AREA LANDS

Within the 18 counties of Game Zones I, II, and IV (comprised of the Central, Western and Mountain Hunt Units), the S.C. General Assembly has granted to the S.C. Wildlife and Marine Resources Department Executive Director authority to set regulations, seasons, and bag limits. Deer and turkey on all lands, both public and private, within these 18 counties may be hunted only within the hunt unit boundary lines. WMA regulations apply to all lands within the boundary, both public and private.

LANDOWNER PREMISSION REQUIRED

Possession of a hunting license and a management area permit does not give the holder the right to use private lands. Lands inside the hunt unit boundaries, but not marked by U.S. Forest Service or Wildlife Management Area signs, are considered posted as private property. Permission from the landowner must be obtained prior to entering these lands. Persons not obtaining landowner permission may be charged with trespassing and receive a fine, jail sentence, or both.

Glossary

Bulk Cargo - Cargo shipped in its original or processed state without packaging. Cargo cannot be physically or mechanically handled without further containment.

Breakbulk Cargo - Cargo, other than containerized, in packages or able to be handled physically or mechanically without further containment.

Containerized Cargo - Cargo shipped in a dry, liquid, or refrigerated state in a metal, fiberglass, plastic, or wooden construction. A container must confine and protect its contents from loss or damage from the elements, and must be susceptible to being handled in transit as a unit. The term container refers to the standard 20-foot (19'10-1/2" x 8'0"), 35-foot (35'0" x 8'0"), or 40-foot (40'0" x 8'0") seagoing container.

Primary Highway System - The primary highway system is composed of all Interstate, U.S. and S.C. numbered highways.

Secondary Road System - The secondary road system is composed of all State-maintained roads, except Interstate, U.S. and S.C. numbered highways.

Glossary

Live Birth - The complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or any definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

Death - The permanent disappearance of any evidence of life at any time after live birth.

Infant Death - Death of a live born infant under one year of age.

Residence Allocation - Vital events in these tables are allocated to the place of residence (county) regardless of the place of occurrence. In the case of a birth, residence is the usual residence of the mother. Deaths are allocated to the residence of the deceased.

INVENTORY OF STATISTICAL SERIES OF SOUTH CAROLINA

The Inventory of Statistical Series of South Carolina was originally a publication that contained a description of each State agency and a listing of all the statistical series put out by the agency. The descriptions of each agency have not changed and can be located in other publications, such as the Budget and Control Board Annual Report, Budget Data Report, and the Budget and Control Board Information and Technology Plan.

This Inventory lists the annual statistical series generated by various State agencies. Each State agency was contacted and asked for a listing of its annual publications. This chapter contains a compilation of the information received, and has been arranged in the same sequence as the other chapters. It can be used as a reference in locating additional and more detailed information than is presented in each chapter. Users may contact the contributing agencies directly for more information on their publications.

SOURCE APPENDIX

Guide to Sources of Statistics

The *South Carolina Statistical Abstract* is an abstract. It presents as much statistical information as possible in tabular form, but it is also a guidebook to the sources from which the statistics have been obtained. In almost every instance, the issuing agency has additional data, or perhaps more recent information, by the time this publication reaches the user. Most of the sources are as close as the telephone or the nearest library.

State Sources--Most of the State publications are available free of charge, or for a nominal fee, from the agencies which issue them. The State has a system of depository libraries coordinated by the State Library. All State agency publications are supposed to be on file in depository libraries and the State Library.

Federal Sources--Some federal reports are available without charge from the agencies which issue the information, but most federal publications must be purchased from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402 (phone 301/783-3238). Publications purchased from the GPO must be paid for in advance. *The Statistical Abstract of the United States* is similar in purpose to the *South Carolina Statistical Abstract*. Users who are interested in information about the nation, its regions, and states are referred to it.

Private Sources--A number of private agencies and associations issue publications or reports which have been used in this edition of the *Abstract*.

Computer tapes--All tables in the *Abstract* were prepared by using a computerized word processing system. Individual tables and additional information can be obtained from the South Carolina State Data Center (734-3788).

For the user who requires additional or more specialized information, this section contains the names, addresses, and telephone numbers of contributors to this edition of the *South Carolina Statistical Abstract.* Also included is a listing of South Carolina Affiliate Data Centers, which have been established throughout the state to facilitate access to statistical data at the local level. The affiliate data centers are composed of 10 regional planning councils and 27 libraries. Each affiliate has a basic census reference collection of frequently used statistical reports.
